

This is our 6' tall x 6' wide x 12' long underground fallout shelter

Standard, included features include:

Blast door entrance --- Blast valves with appropriate vent pipes --- Chemical and biological filtering system --- corrosion anodes to prevent rust --- lift cylinders for the door where it opens and closes easily --- (2) pin quick sliding latch for door, (4) 2,500 pound door latches, (1) door jack rated at 8 tons to lift door in case debris is blown on top of shelter --- shelter primed, painted, and carpeted --- inlets for electricity, water, phone, and tv cable --- 100 amp breaker box inside for electricity, junction boxes, plug-in boxes, and light switch boxes installed.

We will completely install the shelter for you.

We will furnish an excavator --- all equipment including crane (if needed) --- (5) yards of concrete under the shelter to keep water pressure from moving the shelter --- corrosion anode to prevent shelter from rusting --- supplies, labor, ect. --- all included in the price below.

Total cost of this shelter, built and installed for you ----- \$21,280.00

Your only other expense is the delivery --- We charge \$2.50 per mile from the Louisiana fabrication facility to your location
